Go7 Ambassador Program

The complete guide — how the referral system works, what you earn, and how you get paid.
Pilot edition · Go7 Logistics · Abeokuta (CAMP ↔ FUNAAB corridor live)

Your personal referral link: `go7.ng/r/YOUR-CODE`
Share it anywhere — TikTok, WhatsApp status, campus groups, broadcast lists, DMs. Every ambassador's code is unique.

How it works — step by step

1. **You share your link.** Customer taps it — the code is remembered automatically, or they can type it in at signup.
2. **They sign up + verify their phone.** The customer is locked to **you** forever. First ambassador to reach them wins — no one can take them later, and they can't switch ambassadors.
3. **They place real orders.** You earn on their first **paid, delivered** order — and keep earning on their repeat orders.
4. **You get paid weekly.** Rewards are reviewed for fraud, approved, then sent to your bank account.

What you earn — first order

Referral's first food order value	Your reward
₦1,500 – ₦2,499	₦100
₦2,500 – ₦3,999	₦200
₦4,000 and above	₦300
Parcel / Book Delivery ≥ ₦2,000 total	flat ₦150
Anything below ₦1,500	₦0 (doesn't count)

Note: food rewards are based on the food subtotal — delivery fees don't count toward the tier.

What you earn — repeat orders

Every repeat qualifying order from the same referral pays **₦150**, up to **5 repeat rewards per customer** (orders 2–6). After the 6th order the customer still counts as yours — you just don't earn more from that one.

Referral's journey	You earn
First order ₦4,000 + 5 repeats	₦300 + (5 × ₦150) = **₦1,050**
First order ₦2,000 + 3 repeats	₦100 + ₦450 = **₦550**
Parcel first + food repeats	₦150 + repeats as they order food

Your referral gets ₦200 free — use it

Every new customer you bring gets ₦200 Go7 credit automatically on their first order.

Lead with it. "Get ₦200 free food" beats "download Go7" every single time. Your pitch:

- *"Use my code GO7XXXX and get ₦200 free on your first Go7 order"*
- *"Free ₦200 — just sign up with my link and order"*
- Screenshot the credit — post it as proof it works

The ₦200 costs Go7, not you — you still earn your full ₦100–300 tier + repeats on top.

Worked example — a good month

Scenario: You refer 30 customers. 20 of them order ₦2,500+ first, then average 3 repeats each.
First orders: 20 × ₦200 = **₦4,000**
Repeat orders: 20 × 3 × ₦150 = **₦9,000**
Total ≈ ₦13,000 for one month — and repeat customers keep paying you.

How much can you earn per month?

Maximum per customer: ₦300 + (5 × ₦150) = ₦1,050. Your monthly income = active customers × average reward. The big drivers: first-order size (₦300 tier needs ₦4,000+ baskets) and repeat orders (₦750 of the ₦1,050 max comes from repeats).

Effort level	Customers ordering	Customer earnings	Vendors (₦300 each)	Monthly total
Casual — share link occasionally	15–20	₦6,000–8,000	0–1 = ₦300	**₦6,000–8,300**
Active — post regularly, follow up	40–50	₦20,000–25,000	1–2 = ₦600	**₦20,600–25,600**
Aggressive — campus + vendor outreach	80–100	₦48,000–60,000	3–5 = ₦1,500	**₦49,500–61,500**
Theoretical max	100 × ₦1,050	₦105,000	5 = ₦1,500	₦106,500

> **Honest expectation:** ₦20,000–50,000/month is achievable for an active campus ambassador. This is steady side income, not a salary — the ambassadors who win are the ones who get their referrals ordering *repeatedly*, not just once.

Getting paid

1. Rewards land as **PENDING** — Go7 reviews each one for fraud.
2. Approved rewards are paid **weekly to your bank account**.
3. Track everything in the app → **Partner Dashboard** (signups, qualified customers, pending/approved/paid amounts).

What counts — and what doesn't

✅ Counts	❌ Doesn't count
New customer, verified phone, first delivered paid order	Orders below ₦1,500
Repeat delivered paid orders (up to 5)	Cancelled, refunded, failed, unpaid orders
Food orders, parcel/delivery bookings	Self-referrals, second accounts, same phone
Customers who verify their phone	Test orders, disputed orders, fraud-flagged orders
	GoBuy/fuel orders (not in pilot)

> **Fair-play:** our system checks phone numbers across accounts, fingerprints referrals to the first ambassador, and voids rewards on refunded orders. Genuine referrals are the only ones that pay — play it straight and you'll never have an issue.

FAQ

Can I refer existing Go7 users? No — the credit and rewards are for acquiring NEW customers.

What if they don't enter my code? The link saves it automatically when they tap it — always share the link, and remind them to check the code field at signup.

Does their app-install journey matter? If they install from the Play Store first, they must enter your code manually at signup — remind them.

Why is my reward still PENDING? Every reward is reviewed before payout. Approved ones pay out in the weekly batch.

My reward was voided — why? Almost always: the order was cancelled/refunded, or the account failed fraud checks (duplicate phone, self-referral).

Is there a limit? The pilot has monthly campaign budgets — rewards are first-come. Push early in the month.

Can two ambassadors claim the same customer? No — the first valid attribution wins permanently.

Bonus lane — recruit vendors

Restaurants pay you too. Bring a real vendor onto Go7 and when they complete their **first delivered order**, you earn **₦300** — up to 5 vendors (₦1,500).

What works	Why it sells
Vendor keeps **92%** of every sale	Highest commission share in town
Same-day payouts — order delivers, money lands in bank in minutes	No waiting for weekly settlement
Ghost shops earn you ₦0	Only real vendors with real first orders pay — bring kitchens that cook

Pitch: "List your restaurant on Go7 — you keep 92%, get paid same-day, and riders deliver for you."

How we keep score — perform or fall off

This is a **results program**, not free money. Here's how we run it:

Stage	What happens
Week 1 — Prove it	Get your first 3+ paying referrals. Slow start = we help. Zero orders = your code goes quiet.
Weekly leaderboard	Top performers get called out + bonus shoutouts. Your dashboard shows your numbers — we watch them too.
Weekly payout	Rewards land every week — but only for real, delivered, paid orders. Fraud = instant removal, no appeal.
Repeat kings win	One-time order-pushers earn ₦100-300 once. Ambassadors whose referrals keep ordering make 5× more. Nurture your customers.

> **Reality check:** signups that never order pay ₦0. Dead codes get suspended. We track everything — customers, orders, cancellations, repeats. Deliver real volume, or step aside for someone who will.

Your playbook

- **Lead with the ₦200:** "Get ₦200 free on Go7 — use my code" converts better than "sign up".
- **Target ₦2,500+ first orders:** that's when your reward jumps to ₦200/₦300.
- **Repeat users = your income:** check in with your referrals — remind them to order again.
- **Watch your dashboard:** signups that never order earn ₦0 — follow up.
