**Customer uses "Add extras" for optional items**

GO7 Nigeria · go7.ng · Version 1.0

# 1. Three building blocks

### Main product

One plate or drink with a price. Example: Rice & Beans — ₦1,200.

### Add-ons (extras)

Items that go with that plate. Example: Fried Egg +₦200, Water +₦150.

### Separate products

Standalone items. Customer adds each alone: Rice, Beans, Egg, Water.

> **Agent tip:** One plate = one main product. Things with that plate = add-ons. Things ordered alone = separate products.

**Option A: Combo + extras**

Rice & Beans (main)

+ Fried Egg (extra)

+ Water (extra)

Button: Add extras

**Option B: Separate items**

## 4. Agent checklist

| # | Task | Done |
|---|---|---|
| 1 | Ask: combo plates or separate items? | ☐ |
| 2 | Create Categories (Rice, Drinks, etc.) | ☐ |
| 3 | Add 3+ products with photos and prices | ☐ |
| 4 | Add extras on combo products (egg, water) | ☐ |
| 5 | Test public menu as a customer | ☐ |
| 6 | Confirm vendor visible after approval + live products | ☐ |

> Sample script: "Your Rice & Beans is one product. Egg and water are **extras** customers pick with Add extras. If you sell rice alone, we make separate products."

## 5. FAQ

**No "Add extras" button for customer?**

Product has no add-ons — vendor must add extras and save.

**Vendor not on homepage?**

Must be admin-approved with at least one active product.

**Water — add-on or separate?**

With a meal → add-on. Sold alone often → separate product.

**Why "Add extras" not "Customize"?**

Clearer for Nigerian customers — optional items with a dish.
